

Glovebox Information Page Planner

Give the useful page a clear owner, a sensible scope, and a review date.

What belongs on the page

☐ Selected roadside contact route	☐ Insurance resource link
☐ Maintenance reference or notes	☐ Family instructions
☐ Other: _____	☐ Keep the page limited to what a helper needs

Who owns the page and keeps it current?

Keep actual contact details, policy information, addresses, and other private records in the systems you already use. This sheet is for planning; it does not need those details.

Where the card lives

Where in the glovebox will the card live?

Who should know where to find it?

Check the route

☐ The destination is the page we meant to use	☐ The card is in its agreed place
☐ We tested a tap while safely parked	☐ We know who reviews the page

Last checked

_____	Review after
	A meaningful change to the contacts, link, or vehicle notes.

An NFC card opens the owner-selected page on a compatible phone. Access depends on the phone, connection, permissions, and destination. It does not call for help, dispatch service, track the vehicle, verify coverage, or replace official documents or emergency procedures.
