

EXHIBIT TAP-POINT READINESS

A practical check for one visitor question, one approved destination, and one well-placed NFC tag.

Exhibit / visitor-resource title

Tap-point location (freestanding information stand or outside of guide folio)

Visitor question this resource answers

Approved destination URL

Content owner and review date

Before placing the tag

Check	Ready	Notes / owner
Destination approved by the institution and maintained by a named owner	☐	
Language and accessibility review completed through the institution's normal process	☐	
Placement approved; tag stays away from artwork, objects, cases, accession labels, and storage	☐	
Tag tested with a compatible phone at its final location; destination loads as intended	☐	
A fallback route is available for visitors who cannot or choose not to tap	☐	

Keep the destination focused

Use an institution-approved visitor resource. Do not put visitor personal information, collection inventory, credentials, or restricted records in the tag URL. The tag opens a link; it does not host content, identify visitors or objects, manage collections, or measure engagement.
