

Orthotics practice resource kit

Put the resource beside the sample.

A short setup sheet for the person who owns the link, the team that uses it, and the five cards that put it within reach.

5 PVC NFC CARDS

ONE RESOURCE HUB

CUSTOM PRINT OPTIONAL

Choose the destination

Use one organization-selected resource page for this starter kit. Keep provider portals behind their usual sign-in. Keep patient-specific information in the practice's approved system.

RESOURCE HUB OR PAGE	RESOURCE OWNER
REVIEW DATE	WHO CAN UPDATE THE DESTINATION?

Place the five cards

Pick the spots where someone naturally asks for the next resource. All five cards in this kit use the same destination.

PLACEMENT	WHAT STAFF NEED TO FIND	TESTED
Sample display		☐
Fitting station		☐
Sizing or scanner reference		☐
Order desk		☐
Staff resource point		☐

Before the team relies on it

☐ Tap a card with a compatible phone and confirm the right page opens.	☐ Name the person who checks the link when resources change.
☐ Confirm any restricted provider resource still requires sign-in.	☐ Keep patient names, diagnoses, prescriptions, and scans off public pages.

The card opens a destination. It does not place orders or replace the practice's clinical judgment.
