

Field Sampling Documentation Point Map

Put the right map, form, or project contact beside the point where it is needed.

PROJECT / AREA

FIELD LEAD

Start with the places where people search most. Use the point names your crew already uses. Assign an owner to each link and note when it was last checked.

POINT / SITE LABEL	TAG FORMAT	RESOURCE OR LINK LABEL	OWNER	LAST CHECKED
1	Cable-tie			
2	Cable-tie			
3	Cable-tie			
4	Cable-tie			
5	Adhesive			
6	Adhesive			
7	Adhesive			
8	Adhesive			
9	Rigid card			
10	Rigid card			

Keep formal records in the system authorized for the work.

An NFC tag opens a selected link. It does not identify a sample, create a record, verify a step, or manage chain of custody. Do not put sensitive data on a public page.
