

SDS Access Point Map

Plan the route before the tag goes on the cabinet.

One location. One customer-controlled destination. A fallback your team can use.

1 LOCATION AND DESTINATION

Work area / team

Approved placement location

Equipment, cabinet, or location ID (optional)

SDS file or approved library reference

SDS / destination owner

Who needs access here?

2 ACCESS CHECK

☐ Placement follows site rules

☐ Required container labels stay clear

☐ Existing SDS source remains authoritative

Test where the work happens

Phone(s) tested and test date

Network / sign-in / permission notes

3 KEEP THE ROUTE WORKING

Person who reviews the destination

Review date or change trigger

Approved fallback if phone, network, permission, or link is unavailable

4 OPTIONAL BASELINE

Before placement: typical time to find the correct sheet: _____ Observed lookups per month: _____

Notes for the person maintaining this access point
