

Sitter Handoff Snapshot

A quick way to agree on the page, the tag location, and what needs a conversation.

Keep the handoff simple.

Put selected notes on the page you choose. Talk through anything that needs judgment, context, or a direct answer.

Choose what belongs on the page

Use categories only. Keep personal details in the service and records you already control.

- ☐ Pet routine and supply locations
- ☐ Plant or household notes
- ☐ The contact route the helper should use
- ☐ A note about what should be discussed directly

Agree on the handoff point

Where should the trusted helper look first?

Who will keep the selected page current?

Before the visit

- ☐ Confirm the selected page opens on a compatible phone.
- ☐ Review what the page shows and how it is shared.
- ☐ Place the tag where the helper expects it; keep private details out of view.
- ☐ Recheck the destination after routines or contacts change.

LEAVE OFF A SHARED PAGE Door or alarm codes, Wi-Fi passwords, travel dates, and sensitive household or pet details.

The NFC tag opens the URL you supply. The selected page service controls its content, sharing, hosting, and updates.

A CLEAR HANDOFF STARTS WITH A PAGE SOMEONE OWNS.
